SUMMARY

Senior Software Engineer with 7+ years of experience building web applications and internal platforms. Strong background in TypeScript, React, frontend architecture, microfrontends, platform engineering, and developer experience. Experienced in driving technical initiatives across multiple teams, mentoring engineers, and delivering products from architecture and MVP to production.

EXPERIENCE

- **Ecom.tech**

Senior Frontend Engineer

Aug 2022 – Present

- Designed and led the development of a Single-SPA microfrontend platform used by 1,500+ employees.
- Worked across 5 cross-functional teams to define platform architecture, integration contracts, and technical standards, documenting key decisions through ADRs.
- Built a shared integration layer and scaled the platform to support 50+ independent widgets and application modules.
- Led the development and launch of 3 internal products, from requirements and architecture to MVP delivery and further evolution.
- Led technical initiatives within a ~10-person product team, contributing to planning, code reviews, mentoring, and onboarding.

- **Market Logic Software**

Software Engineer

Jul 2021 – Aug 2022

- Worked in an international distributed team on an enterprise SaaS platform serving 100+ corporate customers across Europe and North America.
- Developed and maintained 5 microfrontends using React, TypeScript, and Redux.
- Led a large-scale frontend refactoring initiative that reduced newly introduced defects from ~50 to ~20 per month.
- Eliminated duplicated dependencies across microfrontends, reducing page load times by up to 25%, and contributed shared tooling and platform packages.

- **BIMDATA**

Full-Stack Developer

May 2019 – Jul 2021

- Developed a cloud platform for construction project management as part of a full-stack product team.
- Integrated an interactive BIM/3D model viewer into a React application using Three.js and Pixi.js.
- Built reusable UI components, configured GitLab CI/CD pipelines, and contributed to a Webpack-based microfrontend architecture.

PROJECTS & WRITING

- **nikhcevov.me**: Technical blog covering frontend architecture, Linux, developer tooling, and systems engineering.
- **PixelState**: Rust-based automation engine for real-time screen capture, pixel analysis, and state reconstruction.

SKILLS

- **Languages & Runtime**: TypeScript, JavaScript, Node.js, Rust (personal projects)
- **Frontend**: React, Redux, Next.js, HTML, CSS, SCSS
- **Backend & APIs**: REST, GraphQL, Apollo, WebSocket
- **Architecture & Tooling**: Microfrontends, Single-SPA, Webpack, Vite, Docker, GitLab CI/CD, Jest
- **Additional**: Three.js, Pixi.js, ADRs, technical documentation, code review, mentoring

EDUCATION

ITMO University — B.Sc., Software Development and Information Systems

Sep 2017 – Jun 2021

LANGUAGES

English C1 · Russian Native
